GSA Awards York Telecom AIMS Contract

Award will encompass a wide range of media services, video production, post production, streaming media, advertising and public relations.

EATONTOWN, NJ — The United States General Services Administration (GSA) has awarded York Telecom a five year Advertising and Integrated Marketing Solutions (AIMS) contract.

More than 100 Federal agencies, organizations and the District of Columbia are now able to leverage the experience and expertise of York Telecom's award-winning media services division, York Media, for a wide range of video and film production and postproduction, streaming media, advertising, public relations and related media services.

"As one of the nation's leading media services solutions providers, we are excited about this opportunity to more easily serve our extensive Federal client base" said Mark Maxey, York Telecom Vice President of Media Services, noting that York Telecom has been providing innovative communications and collaboration solutions to Federal agencies since the company's inception in 1985.

The GSA Advertising and Integrated Marketing Solutions Schedule is a streamlined procurement vehicle available to federal agencies and other organizations for obtaining services and products from pre-qualified vendors. Key advantages of York Telecom's AIMS Federal Supply Schedule 541 (GS-07F-0404U) include a significant reduction in lead time to obtain services as prices have already been determined to be fair and reasonable and competitive requirements have already been met. There are no maximum order limitations and all applicable laws and regulations have been applied.

About York Telecom
