

# Staffing Services

York Telecom has been augmenting and staffing technology departments throughout its nearly 20 year history. We manage the day-to-day operations of some of the most mission critical applications and networks within the Federal Government.

Our highly trained technical experts specialize in visual communications and complimentary technologies such as Voice, Voice over IP, Data Networks, IT Infrastructure and Cabling. York Telecom's global coverage area combined with our expertise and capabilities make us your single point of contact allowing us to serve you faster with the highest quality of service.

We offer a wide range of services that fall into three basic categories: Staff Augmentation, Outsourcing & Outstaffing, and Placement Services.

**Staff Augmentation** –With the ever-increasing need for companies to be competitive in this dynamic marketplace, pressure on the staffs of both large and small companies has increased dramatically. York Telecom can aug-

ment existing staff with specialized consultants for either long term or for short-term projects. Our technologist are prepared to assist with everything from installation to day-to-day maintenance and implementation.

**Outsourcing/Outstaffing** –For organizations not already employing an in-house technical support staff, York Telecom can provide personnel on an outsourced basis to manage the day-to-day support requirements. We will assign a dedicated field engineer to work on-site and ensure that your applications and network run smoothly. If required our technical staff will assume complete responsibility for a specific project or department.

**Placement Services** –When you're ready to hire your own in-house staff, York Telecom's professional recruiters and consultants can help you locate talented industry veterans specializing in the technologies you most require. Our extensive global network of contacts within the visual communications industry gives us the ability to identify the high caliber individuals you require.
