

Courtroom Solutions

York Telecom's solution brings the benefits of visual communications to the courtroom. By incorporating our full multi-media solution, including videoconferencing and an integrated touch-panel control system, courtrooms can operate more efficiently in a streamlined, stable, easy-to-use technological environment. Individual applications include remote arraignments, after-hours single courtroom, archiving proceedings, video-oral arguments, pre-trial proceedings, parole hearings and multi-point conferencing.

The Courtroom Solution includes the following:

- Near and far site camera control
- Multi-point call control
- User-friendly interface for call control
- Customized pre-programmed scenarios for simple set-up and monitoring
- Multi-view screen scenarios (single, split screen, or quad-screen)
- Video streaming or video taped/DVD archiving capabilities
- Compatible with third party scheduling software
- Optional multi-media and A/V peripherals, such as document camera and electronic white board, also controlled by a single switch
- Hub-based system allows scalability, seamless resource allocation and stability
- Capability for remote sidebar and private conferences
